

Tips for getting the most out of a day at Disney and Universal Studios:

1. There is incredible architecture, food, culture, history, education, etc. at Disney. Allow yourself the opportunity to experience as much as you can.
2. Do not lose your Disney ticket. Do not let your Disney ticket get wet. Do not swap Disney tickets with any other student. It is encoded with your name and number. They are VERY expensive (hundreds of dollars) and you need it all week. If you do lose it contact Mr. Jarvie a.s.a.p. (I will have your number recorded and we can go to guest services and try to get you a new one if you are nice).
3. It is very difficult to experience Disney with a large group. 2 – 4 people works best. Groups over 7 have a very difficult time agreeing on anything and always experience the fewest attractions.
4. Try everything! Yes the thrill rides are great – try everything. Don't let someone else talk you out of experiencing something that interests you. Each person will like something different!
5. Get at “program” and make a plan to see all the attractions.
6. The freshman boys will just go on the same thrill ride over and over. **Try everything**.
7. Stop and look around and try something new.
8. Use you dinning card wisely. You can get a lot of food with it if you are a good shopper. Food and drinks are unbelievably expensive. Find the drinking fountain and drink lots of water.
9. Experience things other than the thrill rides – try everything. Go through as many buildings or as many shows or attractions as you can.
10. Have fun and try something new!
